#### + Advantages

- Fixed earnings of 4.00 % per year
- Possible annual early redemption at 100.00 % of nominal amount in.
- Risk buffer (final redemption barrier of 50.00 %) compared to a direct investment in the underlyings
- A fall of the share price below the barrier during the term has no influence on the redemption at the end of the 4th year, relevant is only the price on last valuation date.
- Goldman Sachs Bank Europe SE will set quotes for this product during the term without being legally obliged to do so.

#### ! Risks you should be aware of

- The risk of capital loss depends on the underlying with the worst performance (worst-of). For this product with worst-of structure despite several underlyings there is no risk diversification by spreading the market risk as for a conventional basket product; instead there is a risk concentration.
- If according to the repayment terms shares are delivered upon maturity, there may be losses for the investors. Delivered shares cause additional costs (e.g. security deposit fees, transaction fees upon sale).
- Investors bear the risk of the issuer

Performance since inception in %	-

Goldman Sachs Group Inc.

- The earnings are capped at 16.00 %, even if the underlyings perform better.
- During the term the bond price will not vary 1:1 with the underlyings and premature sale may lead to capital loss.
- This express bond is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Goldman Sachs Group Inc. may not be able to meet its obligations arising from the bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

**Express bonds | Description**

This express bond of Goldman, Sachs & Co Wertpapier GmbH refers to the shares of Erste Group Bank AG and Raiffeisen Bank International AG. Regardless of the performance of the underlyings, there is an annual interest payment of 4.00 % p.a. The bond will be redeemed on 03/11/2025 if there is no automatic early redemption.

There is an automatic early redemption, if the closing price of both underlyings is at or above the strike price on one of the valuation dates (27/10/2022, 27/10/2023, 28/10/2024). In this case investors receive the respective early redemption amount of 100.00 % of the nominal amount on the early repayment date (03/11).

If the express bond has not been redeemed early, there are two possibilities at maturity:

1. If the closing price of the underlying with the worst performance is at or above the final redemption barrier on the last valuation date (27/10/2025), investors receive 100.00 % of the nominal amount plus the interest payment of 4.00 % for the final year.
2. If the closing price of the underlying with the worst performance is below the final redemption barrier on the last valuation date, shares (defined by the ratio nominal amount/ strike price) of the underlying with the worst performance (worst-of) are delivered. In addition the interest payment of 4.00 % for the final year is paid. Fractions of shares are settled in cash. In this case, there is a capital loss.

Information on the product during the term can be found on the issuer's website:  
<https://classic.gs.de/detail/DE000GX1MBB3-sonstiges-zertifikat-auf-erst-vi-rbiv-vi>

**Secondary market**

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
