Description

Austrian corporate bonds are issued as fixed- or floating-rate securities. The dividend (coupon) is usually paid once a year, and at the end of maturity the bond is redeemed in full. The maturities are usually within a range of three to thirty years. If the bond has already been issued in the past, the investor may buy the security at its market price which is set by supply and demand. One criterion of evaluation for a bond is the rating it gets from independent rating agencies. The lower the rating, the riskier the investment – and the higher the interest rate.

Payment notes

This bond pays a coupon of 3.00 % p.a.

Settlement

This bond is redeemed on 25.06.2026 at 100 %.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
