### Reverse convertibles | Description

This protect multi reverse convertible bond refers to the shares of Deutsche Telekom AG, Nokia Corporation and Telefonaktiebolaget LM Ericsson (underlyings). The bond has a term of one year (maturity 30/09/2020) and a risk buffer (=barrier; "protect").

Investors receive a fixed coupon of 6.20 % p.a. on the nominal amount (EUR 1.000) upon maturity regardless of the performance of the underlyings.

The redemption of the nominal amount at maturity depends on the performance of the underlyings:

1. The closing prices of all underlyings are always above the barrier (60.00 % of the strike price) during the observation period, 27/09/2019 (excl.) - 23/09/2020 (incl.). In this case investors receive the nominal amount.
2. At least one underlying is at or below its barrier during the observation period. Then the redemption amount equals the nominal amount multiplied by the performance of the underlying which had the worst performance. In this case the redemption amount can be below the nominal amount or even be zero, whereas the maximum amount for redemption is 100.00 % of the nominal amount.

### Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
