since inception

Performance since inception. Performances under 12 month have only little informative value because of the short maturity. Information about previous performance does not guarantee future performance.

Source: Erste Group Bank AG

+ Advantages

- 1:1 participation on the positive performance of the STOXX® Global Select Dividend 100 Index, up to +60.00 %.
- Globally diversified equity index containing 100 stocks of America, Europe and Asia/Pacific region.
- Erste Group Bank AG will set quotes for this product during the term without being legally obliged to do so.
- Redemption is at least 100.00 % of nominal value at maturity and therefore protection against capital loss compared to a direct investment in the respective stocks of the index.

! Risks you should be aware of

- The entitlement for redemption at 100.00 % of nominal amount applies only at maturity.
- During the term prices are fluctuating and premature sales can lead to capital loss.
- There is no continuous coupon payment and redemption at maturity is capped at 160.00 % of the nominal amount.
- The stocks contained in the index can change and may perform worse compared to those stocks contained during subscription for this product.
- This bond is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Erste Group Bank AG may not be able to

Performance 5 years in %	-
Performance since inception in %	-

meet its obligations arising from the bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

Guaranteed products | Description

The ERSTE Global Select Garant II 20-30 refers to the STOXX® Global Select Dividend 100 Index as underlying, has a fixed term and will be redeemed on 28/02/2030 (maturity). During the term there is no interest payment and investors do not receive any other proceeds.

The redemption at maturity depends on the performance of the underlying. Redemption is at least 100.00 % of the nominal amount (minimum redemption amount) and at most 160.00 % of nominal amount (maximum redemption amount). The participation on the positive performance of the underlying is capped at 60.00 %. Above this cap there is no participation on a possible further positive performance of the underlying.

The redemption amount is determined as follows:

1. If the closing price of the underlying on the valuation date is above the strike price, redemption is at 100.00 % of the nominal amount plus the positive performance of the underlying multiplied by the nominal amount, capped at 160.00 % of the nominal amount (maximum redemption amount);
2. If the closing price of the underlying on the valuation date is at or below the strike price, the minimum redemption amount applies which is 100.00 % of the nominal amount.

The STOXX® Global Select Dividend 100 Index contains the stocks with the highest dividend yield from the Americas, Europe and Asia/Pacific regions. The underlying is a price index. This means, dividend payments of the companies in the index are not included in the calculation of the index. Further information on the index can be found at <https://www.stoxx.com/index-details?symbol=sdgp>

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
