Performance 5 years in %	-
Performance since inception in %	-

- 100.00 % of nominal amount
- If there was no early redemption and if there was no interest payment during the term, redemption is at 100 % plus 35.00 % at the end of the 5th year, if the closing price of the underlying with the worst performance is at or above the final-redemption-barrier on the final valuation date.
 - Risk buffer (final-redemption-barrier of 65.00 %) compared to a direct investment in the underlyings. A fall of the share price below the barrier during the term has no influence on the redemption at the end of the 5th year, relevant is only the closing price on the final valuation date.
 - Erste Group Bank AG will set quotes during the term without being legally obliged to do so.
- product with worst-of structure despite several underlyings there is no risk diversification by spreading the market risk as for a conventional basket product; instead there is a risk concentration.
- If the closing price of the underlying with the worst performance is below the final-redemption-barrier on the final valuation date, there are losses for the investors. A total loss of invested capital is possible.
 - During the term the bond price will not vary 1:1 with the underlyings and premature sale may lead to capital loss.
 - The earnings are capped at 35.00 %, even if the underlyings perform better.
 - This memory express bond is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Erste Group Bank AG may not be able to meet its obligations arising from the bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

Express bonds | Description

This memory express bond (worst-of) refers to the shares of Allianz SE and AXA S.A. (underlyings). It offers an interest payment which depends on the performance of the underlyings. The bond has a term of five years, if there is no early redemption. The redemption at maturity depends on the closing price of the underlyings on the final valuation date.

Interest payments: Interest of 7.00 % on the nominal amount is paid on the annual interest payment date (04/06), if the closing price of the underlying with the worst performance is at or above the coupon barrier (65.00 % of the strike price) on the valuation date. Otherwise, there is no interest payment. If the interest payment has not been triggered at one or several interest payment dates but has been triggered at a later interest payment date, the interest payments of the earlier periods are paid retrospectively (memory function).

Redemption: The bond will be redeemed on 04/06/2025 if there is no automatic early redemption. There is an automatic early redemption, if the closing price of the underlying with the worst performance is at or above the redemption barrier (100.00 % of the strike price) on one of the valuation dates (28/05/2021, 30/05/2022, 29/05/2023, 28/05/2024). In this case the early redemption amount and the interest amount due at this time are paid.

If there is no early redemption the bond will be redeemed at maturity as follows:

1. If the closing price of the underlying with the worst performance is at or above the final redemption barrier on the final valuation date (28/05/2025), the bond is redeemed at 100.00 % of the nominal amount (plus the relevant interest amount).
2. If the closing price of the underlying with the worst performance is below the final redemption barrier on the final valuation date, a predetermined number of shares (defined

by the ratio nominal amount / strike price) of the underlying with the worst performance (worst-of) is delivered. Fractions of shares are settled in cash. Furthermore, there is no interest payment at maturity.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
