#### Advantages

- Your interest rate risk is limited
- Offers you a transparent calculation basis
- You are still able to benefit from low rates
- At any time, you are able to sell back the warrant at market conditions

#### Risks you should be aware of

- The Interest Cap limits your interest rate risk, in spite of that, the credit margin might vary
- Loss of the warrant premium
- Investors bear the credit risk of the Erste Group Bank AG
- This Interest Cap Warrant is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Erste Group Bank AG may not be able to meet its obligations arising from the Interest Cap Warrant in the event of

insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

### Interest-Cap-Warrants | Description

The Interest Cap Warrant is a European Call Option on a reference Interest Rate. If the reference rate rises over the pre-defined strike price, the option pays compensation. Hence, the derivative works similar to an insurance policy. In exchange for a one time up front payment, the option premium, the Interest Cap Warrant limits your interest charge, while you are still able to benefit from low rates. Caps are available with various strikes, maturities and redemption schedules, fitting to your EUR financing. If you do not have a sound opinion on the future interest development and want to limit your risk, while at the same time you want to benefit from low rates, the Interest Cap Warrant is the ideal instrument.

### Secondary market

Limited over the counter trade is possible. The issuer will carry out as far as possible extraordinary trade in these products, nevertheless, is not obliged to it.
