 Advantages	 Risks you should be aware of
<ul style="list-style-type: none"> Investors have disproportionate return potential with little capital investment due to the leverage effect. Investors can participate on rising prices. The influence of time value and volatility is very low. 	<ul style="list-style-type: none"> There is no capital guarantee and a total loss of invested capital is possible. The leverage effect may cause disproportionately high losses. Investors bear the risk of the issuer Erste Group Bank AG. This Turbo is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Erste Group Bank AG may not be able to meet its obligations arising from the Turbo in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

The calculation of the key figures is

Turbos | Description

What are Turbos Long?

Turbos allow investors to participate on market fluctuations of the underlying. Turbos Long

based on the most recently delivered price of the underlying (see date/time stamp in tab underlying).

benefit from rising prices of the underlying. The unlimited earning potential, however, is offset by the risk of total loss if the barrier is hit. For a Turbo Short this barrier is set above the initial price of the underlying at the time of issue. There are Turbos with a certain term and turbos with an indefinite term ("open-end Turbos").

How do Turbos Short work?

Turbos offer an inbuilt leverage effect. The price movements of the underlying are reflected relatively independent of volatility. If the price of the underlying instrument rises, the price of the Turbo Long rises according to the chosen leverage at a disproportionate level. The leverage effect results from the lower purchase price of a Turbo compared to the direct investment in the underlying. The lower the purchase price of the Turbo, the bigger the leverage. Turbos have a strike (base) price and a barrier. The intrinsic value of the Turbo is the difference of the share price and the strike price (Turbo Long).

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
