+ Advantages

- Chance to earn 6.25 % for each year
- Possible early redemption at 100.00 % of nominal amount in EUR
- If there was no early redemption and if there was no interest payment during the term, redemption is at 100.00 % plus 31.25 % in EUR at the end of the 5th year, if the closing price of the underlying is at or above the final-redemption-barrier on the last valuation date.
- Risk buffer (final-redemption-barrier of 65.00 %) compared to a direct investment in the Vestas Wind

! Risks you should be aware of

- If the closing price of the underlying is below the final-redemption-barrier on the last valuation date, there are losses for the investors. A total loss of invested capital is possible.
- Delivered shares cause additional costs (e.g. security deposit fees, transaction fees upon sale).
- During the term the bond price will not vary 1:1 with the underlying and premature sale may lead to capital loss.
- The earnings are capped at 31.25 % even if the underlying has a better

performance.

- Investors bear the risk of the issuer Erste Group Bank AG.
- This memory express bond is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Erste Group Bank AG may not be able to meet its obligations arising from the bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

Express bonds | Description

This memory express bond refers to the share of Vestas Wind Systems A/S (underlying). It offers an interest payment which depends on the performance of the underlying. The bond has a term of five years, if there is no early redemption. The redemption at maturity depends on the closing price of the underlying on the last valuation date.

Interest payments: Interest of 6.25 % on the nominal amount in EUR is paid on the annual interest payment dates (01/02), if the closing price of the underlying at the respective valuation date is at or above the coupon barrier (65.00 % of the strike price). Otherwise, there is no interest payment. If the interest payment has not been triggered at one or several interest payment dates but has been triggered at a later interest payment date, the interest payments of the earlier periods are paid retrospectively (memory function).

Redemption: The bond will be redeemed on 01/02/2026 if there is no automatic early redemption. There is an automatic early redemption, if the closing price of the underlying is at or above the redemption barrier (100.00 % of the strike price) on one of the valuation dates (25/01/2022, 25/01/2023, 25/01/2024, 27/01/2025). In this case investors receive the respective early redemption amount in EUR and the respective interest amount due at this time.

If there is no early redemption the bond will be redeemed at maturity as follows:

- If on the last valuation date (26/01/2026) the closing price of Vestas Wind Systems A/S is at or above the final redemption barrier, the bond is redeemed at 100.00 % of the nominal amount in EUR (plus the relevant interest amount);
- If on the last valuation date the closing price of Vestas Wind Systems A/S is below the final redemption barrier, investors receive a number of shares defined by the ratio (nominal amount / strike price, converted to EUR) of the underlying delivered. Since the underlying is quoted in a different currency than the bond, the strike price is converted into the currency of the bond on the basis of the applicable exchange rate on the last valuation date. The bond is thereby currency-hedged ("quanto"). Fractions of shares are settled in cash in EUR. Furthermore, there is no interest payment at maturity.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
