+ Advantages

- Fixed earnings of 6.75 % per year
- Possible early redemption at 100.00 % of nominal amount
- Risk buffer (final-redemption-barrier of 50.00 %) in case of a falling share price of Voestalpine AG
- A fall of the share price below the barrier during the term has no influence on the redemption at the end of the 4th year, relevant is only the price on the last valuation date.
- Erste Group Bank AG will set quotes for this product during the term

! Risks you should be aware of

- If the closing price of Voestalpine AG is below the barrier (50.00 %) on the last valuation date, there are losses for the investors. A total loss of invested capital is possible.
- Delivered shares cause additional costs (e.g. deposit fees, transaction fees upon sale).
- The earnings are capped at 27.00 %, even if the underlying performs better.
- During the term the bond price will not vary 1:1 with the underlying and premature sale may lead to capital

Express bonds | Description

This express bond refers to the share of Voestalpine AG. Regardless of the performance of the underlying, there is an annual interest payment of 6.75 % of the nominal amount. The bond will be redeemed on 31/10/2026 if there is no automatic early redemption.

There is an automatic early redemption, if the closing price of the underlying is at or above the strike price on one of the valuation dates (24/10/2023, 24/10/2024, 24/10/2025). In this case investors receive the respective early redemption amount of 100.00 % on the repayment date (31/10).

If the express bond has not been redeemed early, there are two possibilities at maturity:

- If the closing price of Voestalpine AG is at or above the final-redemption-barrier on the last valuation date (26/10/2026), investors receive the nominal amount plus the interest payment of 6.75 % for the final year.
- If the closing price of Voestalpine AG is below the final-redemption-barrier on the last valuation date, then investors receive a predetermined number of shares of the underlying, in addition the interest of 6.75 % for the final year is paid. Fractions of shares are settled in cash. In this case there is a capital loss.

The issuer and its affiliates may - without being obliged to - act as market maker for the underlying.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
