fall of the share price below the barrier during the term has no influence on the redemption at the end of the 5th year, relevant is only the closing price on the final valuation date.

- Credit Suisse Securities, Sociedad De Valores, S.A., Madrid will set quotes during the term on Reuters without being legally obliged to do so.

covered by any deposit guarantee scheme. Investors are exposed to the risk that Credit Suisse AG may not be able to meet its obligations arising from the Memory Express Bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

#### Express bonds | Description

This memory express bond issued by Credit Suisse AG refers to the share of OMV AG (underlying). It offers an interest payment which depends on the performance of the underlying. The bond has a term of five years, if there is no early redemption. The redemption at maturity depends on the closing price of the underlying on the final valuation date.

**Interest payments:** Interest of 5.60 % on the nominal amount is paid on the annual interest payment date, if the closing price of the underlying at the respective valuation date is at or above the coupon barrier (65.00% of the strike price). Otherwise, there is no interest payment. If the interest payment has not been triggered at one or several interest payment dates but has been triggered at a later interest payment date, the interest payments of the earlier periods are paid retrospectively (memory function).

**Redemption:** The bond will be redeemed on 30/12/2024 if there is no automatic early redemption. There is an automatic early redemption, if the closing price of the underlying is at or above the redemption barrier (100.00% of the strike price) on one of the valuation dates (23/12/2020, 23/12/2021, 23/12/2022, 27/12/2023). In this case investors receive the respective early redemption amount and the respective interest amount due at this time.

If there is no early redemption the bond will be redeemed at maturity as follows:

1. If the closing price of OMV AG on the final valuation date (23/12/2024) is at or above the final redemption barrier, the bond is redeemed at 100,00% of the nominal amount (plus the relevant interest amount);
2. If the closing price of OMV AG on the final valuation date is below the final redemption barrier, investors receive a predetermined number of shares (defined by the ratio) of the underlying delivered. Fractions of shares are settled in cash. Furthermore, there is no interest payment at maturity.

Information on the product during the term can be found on the issuer's website:
