Reverse convertibles | Description

This protect reverse convertible bond (worst-of) issued by Credit Suisse AG refers to the shares of Immofinanz AG, CA Immobilien Anlagen AG and S IMMO AG (underlyings). The bond has a term of one year (maturity 05/11/2021) and a risk buffer (=barrier; "protect").

Investors receive regardless of the performance of the underlyings a fixed coupon of 7.30 % p.a. on the nominal amount upon maturity.

The repayment of the nominal amount at maturity depends on the performance of the underlyings:

1. The closing prices of all underlyings are always above the barrier (60.00 % of the strike price) during the observation period, 02/11/2020 (excl.) - 02/11/2021 (incl.). In this case investors receive the nominal amount.
2. The closing price of at least one underlying is at or below its barrier during the observation period. However, on the valuation date all underlyings are at or above the strike price. In this case investors receive the nominal amount.
3. The barrier was touched or broken by at least one underlying (based on closing prices) and the closing price of at least one underlying is below the strike price on the valuation date. In this case shares of the underlying with the worst performance (worst-of) are delivered according to the ratio. Fractions of a share are settled in cash.

Information on the product during the term can be found on the issuer's website: <https://derivative.credit-suisse.com/at/en/detail/cs-7-30-prozent-protect-immobilienaktien-20-21/DE000CS8EGF6>

 Advantages	 Risks you should be aware of
<ul style="list-style-type: none"> ▪ The investor receives a fixed coupon of 7.30 % p.a. ▪ Additional risk buffer of 40.00 % in case of falling prices of the underlyings. ▪ Credit Suisse Securities, Sociedad De Valores, S.A., Madrid will set quotes for this product during the term, but is not obliged to. ▪ Chance to make a profit even if underlying prices are slightly falling. 	<ul style="list-style-type: none"> ▪ The earnings are capped at 7.30 % p.a. even if the underlyings perform better. ▪ The risk of capital loss depends on the underlying with the worst performance (worst-of). For this product with worst-of structure despite several underlyings there is no risk diversification by spreading the market risk as for a conventional basket product; instead there is a risk concentration. ▪ If according to the repayment terms shares are delivered upon maturity, capital loss may occur. Delivered shares cause additional costs (e.g. security deposit fee, sales fees). ▪ During the term price fluctuations of the bond are possible and premature sales may lead to capital loss. Limited trading of the bond is possible. ▪ Investors bear the issuer risk of Credit Suisse AG. ▪ This protect reverse convertible bond is not covered by any deposit guarantee scheme. Investors are exposed to the risk that Credit Suisse AG may not be able to meet

its obligations arising from the bond in the event of insolvency or over-indebtedness or from an official order (bail-in regime). A total loss of invested capital is possible.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.
